Professional Summary

Aspiring Software Engineer with a strong foundation in Java, Python, SQL, HTML, and CSS, along with basic knowledge of Data Structures and Algorithms. Passionate about solving problems, building efficient applications, and learning new technologies. Seeking a software development internship to apply programming skills and contribute to real-world projects, with a focus on user-friendly digital solutions.

Education

Sri Krishna College of Engineering and Technology (2023–2027)

B.E in Electronics and Communication Engineering

CGPA: 8.0 (Upto 6th Semester)

Govt.Girls.Hr.Sec. School (2022–2023)

HSC – 83%

Technical Interest

- Software Development
- Web Development
- Data Analysis using Python

Technical Skills

Programming Languages

- Java
- C & C++
- Python (Basic)

Web Technologies

- HTML
- CSS
- JavaScript ,NodeJS

Database

- SQL

Tools

- Cisco Packet Tracer
- Git & GitHub
- MATLAB(Basic)

Certifications

Cisco Networking Academy

- Introduction to Networks
- Switching, Routing and Wireless Essentials
- Enterprise Networking, Security and Authentication

NPTEL - Ethical Engineering Practices , Soft skills

Infosys Springboard – Java, C++,SQL,C

Core Technical Knowledge

- Data Structures & Algorithms(Arrays, Strings, Searching, Sorting)
- Object-Oriented Programming(OOPS)
- Problem Solving

Internship Experience

Southern Railway Signaling Internship | June 2025 (14 days)

- Learned communication and monitoring systems.
 - Understood real-time system operations.
 - Gained knowledge about communication networks used in railway transportation infrastructure.
-

Projects

◆ Language Learning Application | React.js, Firebase, Firestore

- Engineered a full-stack language learning platform supporting multilingual content across six languages.
- Integrated Google Authentication and Firebase Firestore for secure user management and real-time data synchronization.
- Developed interactive learning modules, flashcards, and assessment quizzes to enhance user engagement and retention.
- Implemented progress tracking and performance analytics to deliver a personalized learning experience.

◆ Fitness Tracker Application | React.js, Firebase, Firestore

- Developed a responsive fitness tracking application for monitoring daily activities and goal achievement.
- Leveraged Firebase Firestore for real-time activity logging and cloud-based data management.
- Implemented progress visualization, weekly performance analytics, and goal-tracking dashboards.
- Designed a scalable and user-centric interface ensuring seamless navigation across multiple modules.

◆ Driver Drowsiness and Safety Detection System

- Designed an intelligent monitoring system to identify driver fatigue and enhance road safety.
- Implemented real-time sensor data processing and alert-generation mechanisms for risk detection.
- Developed automated notification logic to improve response time and accident prevention.
- Focused on reliability, real-time decision making, and safety-oriented system performance.
